NetcamViewer Monitor

NetcamViewer Monitor supports the implementation of various functions via a simple HTTP command. This way a connection can be established between NetcamViewer Monitor and external equipment such as camera I/O's, Network I/O's or home automation equipment.

In the explanation of the API of NetcamViewer Monitor we assume that you already have the IP address or hostname.

Perform a HTTP command:

http://[IPADRES]/commands/[ACTION]/[PARAM]

Available HTTP API Commands:

ACTION	PARAM	Omschrijving	Example
hard-reset		Reset NetcamViewer to factory settings to factory settings . Accessible without a password. Only works if HDMI cable is pulled out.	http://10.10.0.25/commands/hard-reset
