AXIS F34 Surveillance System

A complete, cost-efficient solution you can trust.

AXIS F34 Surveillance System offers in one box all the components needed to deploy a discreet and cost-efficient solution for multi-view surveillance. The system enables simultaneous streaming of HDTV 720p videos from four different areas through one Ethernet port. The sensor units can be recessed- or surface-mounted using the included accessories. Video is stored locally on SD cards that are specifically engineered to handle continuous overwriting for lasting performance. With Axis' Zipstream technology, the solution provides efficient video compression, enabling lower bandwidth and storage use. AXIS Companion Line 3.10 software provides secure remote monitoring and video management from a PC or mobile phone.

> **AXIS F34 Main Unit streams HDTV 720p videos from four AXIS F1004 Sensor Units simultaneously**
> **Axis' Zipstream technology**
> **Storage on two AXIS Surveillance microSDXC™ Card 64 GB**
> **Video management with AXIS Companion Line**
